Description

The KwikCOOL 35 is the most powerful ducted portable air conditioning unit on the market that can be operated from a standard 13amp power supply. Supplied with 2.5 metres of ducting, it is ideal for applications that are a short distance from an external source, or where suitable ceiling voids are available.

The unit features a thermostat capable of operating down to 10°C.

Typical applications

- Offices
- Classrooms
- Retail Outlets
- Computer Rooms
- Meeting Rooms
- Reception Areas
- Canteens
- Banks/Building Societies
- Temporary Buildings
- Schools/Colleges/Universities
