cooling when you need it

24/7 SERVICE

RELIABLE

Kwik to install, plug in, switch on and COOL

FEATURES

- Simple user controls, with automatic thermostatic operation
- Safe and easy to use
- Robust construction, very reliable
- Advanced air movement system for very quiet operation
- Install heat exchanger up to 40 metres away on the split units
- All KwikCOOL hire units run from a standard domestic single 13-amp socket
- Economical to run
- Fast to install, plug in, switch on and cool

	Cooling output kW (btu)	Minimum Air delivery m ³ /hr	Maximum Air delivery m ³ /hr	Typical Cooled Area m ³ (ft ³)	Sound Levels Dba @ 3m
KwikCOOL 15	4.5 (15,400)	535	750	109 (3,850)	54
KwikCOOL 25	7.4 (25,000)	634	1350	180 (6,356)	59

The KwikCOOL™ range of air conditioning units have been designed for a fast installation and start-up.

The KwikCOOL™ range gives the hirer all the benefits of a true air conditioning system in a stylish powerful water cooled 'Split' portable air conditioning unit that can operate from a standard single 13-amp power supply .

The KwikCOOL™ split air conditioning units are often the only practical solution where access to the outside is difficult and some distance from internal rooms.

KwikCOOL™

ROBUST

keep cool this summer

World Health Organisation recommends a maximum 24°C (75°F) upper limit for 'comfortable' working conditions.

Increase staff productivity

KwikCOOL 35 UK's largest aircon unit operates from a 13 amp socket

Services

- One of UK's largest range and fleet of air conditioning hire units
- Full installation service
- Modern efficient rental fleet
- Long term hire discounts
- Nationwide service
- National accounts
- Kwik Delivery

Setting the standard for temporary cooling

Experts are predicting another hot summer this year

Daily maximum temperatures in the UK's cities each summer frequently exceed 30°C

As many city workers can tell you, cities can be very hot places during the summer. On warm summer days, the air in a city can be 6-8°F hotter than its surrounding areas. Scientists call this the "Urban Heat Island Effect"

Work performed by people seated in an office are expected to occur at 72°F (22.2 °C) Performance is expected to degrade about 1% for every 2 °F change in room temperature the KwikCOOL hire units provide a perfect solution to this growing problem.

Many businesses can be caught out by fixed installation failures Watkins Hire have provided contingency planning to many of the UK's largest companies.

The KwikCOOL air conditioning range of hire units utilises refrigerants which do not contribute to ozone depletion.

The KwikCOOL units provide an indoor environment that remains relatively constant in a range preferred by building occupants despite changes in external weather conditions or in internal heat loads from computers, photocopiers and other electrical items.

Kwik to install, plug in, switch on and COOL

Creating the right business environment

KwikCOOL™

Temporary air conditioning solutions
