

EVENTS & SITE HEATING

KwikHEAT™

Temporary warm air heating solutions

www.watkinshire.co.uk

MH60 Dual Voltage 100% Fume-Free Heater

The MH60 is a 60kw indirect fired mobile heater, providing 100% fume-free dry heat, efficiently and reliably for distances up to 35 metres away from the heating unit.

- Noise Level 68dba (3m)
- Operates on 110v or 240v at the flick of switch
- Typical Heated Area 1500m³
- Runs on 35 sec diesel or 28 sec Kerosene

MH170 100% Fume-Free Heater

The MH170 is a 170kw (true output) indirect fired mobile heater, providing 100% fume-free dry heat, efficiently and reliably for distances up to 180 metres away from the heating unit (3 times further than the competition).

- Noise Level 63dba (3m)
- Operates on 415v/3 phase
- Typical Heated Area 4392m³
- Runs on 35 sec diesel or 28 sec Kerosene

Heat for hire

Watkins Hire warm air heating division KwikHEAT is one of Europe's leading portable heat for hire companies.

Continual investment in new equipment provides our customers with the most technologically advanced heating units, ensuring true reliability and increased site efficiency, all backed by a 24/7 support service.

KwikHEAT provides a fast and cost-effective solution for the entertainment industry and for a wide range of indoor and outdoor event environments requiring 100% fume-free dry heating.

Whether it's keeping the production team in operation or the audience comfortable, competitive and reliable heating from KwikHEAT will help to keep your programme on track.

Environmental

Watkins Hire is committed to provide heat for hire solutions that give the entertainment industry peace of mind, and assurance that all of our equipment is the latest available technology, and meeting all European environmental standards.

KEEPING YOUR EVENT SPACE WARM

KwikHEAT heaters are highly efficient and offer reduced emissions.

All KwikHEAT heaters are fitted with anti-spill oil connections: the MH170 & MH300 heaters have an oil drip tray under the burner to prevent accidental oil spills.

Space Heating

The KwikHEAT heat for hire product range "100% fume and moisture-free dry air".

KwikHEAT mobile heaters deliver warmth to the most inaccessible areas, making them the only practical facility for film crews and events managers.

KwikHEAT prices do not increase as the weather gets colder!!!!

On location projects, choose the KwikHEAT heat for hire range to:

- Counteract adverse weather conditions.
- Reduce downtime between scene shoots.
- Avoid undesirable noise levels.
- Allow greater comfort for technicians and performers.
- Provide comfort heating to work environments, such as film sets and rehearsal spaces to comply with HSE requirements.
- Protect equipment.

In public arenas, exhibition and concert halls, choose the KwikHEAT heat for hire range to:

- Reduce the effects of humidity on musical instruments and sound equipment.
- Provide comfort in all areas for performers, backstage crews, exhibitors and visitors.

Call us for all your temperature control hire needs

Carbon Reduction

At KwikHEAT we understand and are actively helping the entertainment industry to reduce its carbon footprint. KwikHEAT brings unique and innovative solutions to the entertainment industry, with heaters of efficiencies from 89 to 95%.

KwikHEAT offers wireless thermostatic control for all of the MH range of mobile heaters, which allow accurate control of the heat output, to maintain the desired temperature.

The MH170-300 range is also fitted with time clock and frost stats, allowing full site protection and unattended operation and, more importantly, full control over fuel usage and emissions.

Fuel Management

Ever had hire equipment on site and waited days for fuel to arrive? Running out of fuel results in delays and loss of temperature.

All FuelPAK tanks can be delivered legally to site full of fuel, enabling very quick startup times on site, if required.

KwikHEAT also offers a comprehensive fuel management service ensuring that your hire equipment never runs out of fuel whilst on hire. We draw up a schedule based on your heating equipment fuel requirements and deliver fuel accordingly. This gives you complete peace of mind and lets you concentrate on other things.

MH300 100% Fume-Free Heater

The MH300 is a 300kw (true output) indirect fired mobile heater, providing 100% fume-free dry heat, efficiently and reliably, for distances up to 100 metres away from the heating unit (2 times further than the competition).

- Noise Level 72dbA (3m).
- Operates on 415v/3 phase.
- Typical Heated Area 7275m³
- Runs on 35 sec diesel or 28 sec Kerosene

Watkins Hire are members of the Hire Association Europe (HAE) the leading trade association for hire and rental companies in the UK and Ireland.

Health and Safety

Watkins Hire Ltd is one of the latest group of successful companies to join **SAFEcontractor**. Under the **SAFEcontractor** system, Watkins Hire underwent a vetting process, which examined our health and safety procedures and our track

record for safe practice. Having met the high standards we are included on a database, which is accessible to registered users only via a website, www.safecontractor.com.

FuelPAK bunded fuel tanks

The FuelPAK tanks are truly PPG2 & PPG26 Compliant, UN certificated and, unlike many hire companies, our fuel tanks are truly legal for use on any site.

Ask your current supplier for their UN certification. If they are unable to supply, then the fuel tank is not legally allowed to be used and you may face prosecution from the Environment Agency.

As KwikHEAT's fleet of fuel tanks is brand new, 100% of our fleet of tanks is truly UK legal.

Europe's No. 1

More and more of Europe's leading entertainment and event management companies choose KwikHEAT because we understand that it takes more than innovative, high performance products and superior technical service to help our customers provide the highest standards on a world stage. It takes a total commitment to understanding their needs and the ability to provide the right temperature rental solutions every time.
